INDEX to USDA Miscellaneous Publications, Numbers 1-1479

June 1992

The "Index to USDA Miscellaneous Publications, Numbers 1-1479" was produced to provide a detailed, single-source access to the U.S. Department of Agriculture's (USDA) Miscellaneous Publications. Information for this document was obtained from the National Agricultural Library's (NAL) AGRICOLA database and from the Online Computer Library Center (OCLC) database.

The index is divided into three major sections: Title, Document Number, and Index. The Title section lists all titles alphabetically along with the date of publication and the document number. Publication dates are given for the most recent revisions only. The Document Number section lists all titles in numerical order based upon the series number assigned by the USDA. The Index section provides an alphabetical listing of subject terms. Each subject term is followed by the series number of the document dealing with that subject.

The NAL call number of each Miscellaneous Publications is (1 Ag84m No.xxx), where xxx is the series document number of the publication. To obtain copies of these documents, contact your local or state libraries, including public libraries, land-grant university libraries, or other large research libraries.

Document Delivery Services to Individuals

The National Agricultural Library (NAL) supplies agricultural materials not found elsewhere to other libraries.

Filling requests for materials readily available from other sources diverts NAL's resources and diminishes its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL is viewed as a library of last resort. Submit requests first to local or state library sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. In other countries submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, submit requests to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's Document Delivery Service Information for the Library

The following information is provided to assist your librarian in obtaining the required materials.

Loan Service — Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans are made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

Document Delivery Service — Photocopies of articles are available for a fee. Make requests through local public, academic, or special libraries. The library will submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture*, or the NAL Catalog) and the call number is given, put that call number in the proper block on the request form. Willingness to pay charges must be indicated on the form. Include compliance with copyright law or a statement that the article is for "research purposes only" on the interlibrary loan form or letter. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche — \$5.00 for the first 10 pages or fraction copied from a single article or publication. \$3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm — \$10.00 per reel.
- Duplication of NAL-owned microfiche — \$ 5.00 for the first fiche and \$.50 for each additional fiche per title.

Billing — Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Establishing a deposit account with NTIS is encouraged. **DO NOT SEND PREPAYMENT.**
